BY INNOVATIONS LIGHTING

OUTDOOR  
LIGHTING  
2026

## A TRADITION OF AMERICAN CRAFTSMANSHIP

For more than five decades, **Brass Traditions** has been dedicated to crafting heirloom-quality outdoor lighting in the United States. Rooted in a deep commitment to American craftsmanship, each fixture begins with solid brass and carefully selected global components, chosen for their durability, performance, and timeless beauty.

At the heart of every piece is solid brass, hand-soldered for strength and precision. From there, skilled artisans in the U.S. hand-assemble, finish, and inspect each fixture using time-honored techniques. Every finish is applied by hand, creating subtle variations that enhance the natural character of the metal and allow it to age gracefully over time.

Our artisans bring each design to life through thoughtful detailing, refined metalwork, and a curated selection of glass options, allowing every fixture to feel distinctly personal. From the graceful sweep of a pendant to the welcoming glow of a wall sconce, the stately presence of a post light, or the understated simplicity of a flush mount, each design balances form and function with quiet, enduring elegance.

**Brass Traditions** fixtures are made to order with remarkably short lead times. Through a streamlined process, we are able to handcraft and ship each piece within five to seven days of order, delivering a level of speed and reliability that sets us apart.

Whether illuminating a grand entryway, a coastal veranda, or a garden path, each fixture is more than light. It is a piece of American-made artistry, built to perform beautifully and tell its story for generations.

#### WARRANTY:

All **Brass Traditions** lighting fixtures are backed by a **LIMITED LIFETIME WARRANTY** against defects in workmanship. Electrical components carry a 5-year warranty. Repair services and replacement glass are available upon request.

Due to the nature of our handcrafted living finishes, fixtures are designed to age and develop a natural patina over time. Subtle variations in tint and color are to be expected, as each finish is individually hand applied. These natural variations contribute to the uniqueness of every fixture and will continue to deepen and darken with age.

THE DURHAM COLLECTION blends timeless charm with enduring strength, featuring graceful curves, crisp lines, and rich, hand-applied finishes. Its arched roof and windowpane detailing recall lanterns that once lit historic streets and coastal homes. Available in multiple sizes and finishes, it's as beautiful on a snowy winter evening as it is on a summer night under the stars.

# Brass Traditions

## FINISHES

### ANTIQUÉ BRASS

AB

This unlacquered brass finish is classically colonial and will darken over time. Brass is 70% copper, so it is well suited for coastal conditions because the salt air won't cause it to rust or corrode.

### MATTE BLACK

BK

Black finish is produced with a special Automotive lacquer that is made to stand up to weather. This classic look pairs well with Craftsman and Modern Farmhouse styles.

### BRONZE

BZ

Bronze finish is a rich warm finish with subtle brass highlights. Our Bronze finish is a chemically aged Brass, that we relief on the edges for added depth of character, then sealed with a satin lacquer.

### DARK BRASS

DB

Dark Antique Brass finish is a brass fixture chemically aged to a rich golden-brown tone. There is no lacquer so this finish will continue to darken over time. This finish is "aged" about halfway between our Antique Brass finish and our Gun Metal finish.

### GUNMETAL

GM

Gun Metal finish is a brass fixture that has been chemically patina-ed until the fixture is a deep gray (just like brass that weathers out in nature). These fixtures will continue to darken over time with slight blue & black undertones.

### VERDE GREEN

VG

Verde Green finish is a chemical patina process, not a paint. So, it looks a little different on every fixture, just like when copper ages naturally.

All finishes feature natural variations due to the hand-applied process.

## ACCESSORIES

### CHAINS

The **SOLID BRASS** chain will develop a patina in harmony with the fixture, ensuring a uniform, time-worn appearance. It will not rust and provides greater durability and weather resistance than standard steel chains.

**CL-01 SOLID BRASS CHAIN**  
(ALL CHAIN IS AVAILABLE IN 3 FOOT LENGTHS)

OD-36

All finishes feature natural variations due to the hand-applied process.

### CHIMNEY

**CH-01**  
CLEAR GLASS CHIMNEY  
8 1/2" H x 3" DIA BASE

# Brass Traditions

## ACCESSORIES

### PIER MOUNTS

A practical solid brass finishing touch, the Pier Mount Adapter securely attaches your post light to a flat mounting surface. Crafted in the same hand-applied finish as your fixture, it ensures a seamless, coordinated look while providing a sturdy foundation for lasting performance.

All finishes feature natural variations due to the hand-applied process.
